- Office Productivity Training
- Office Productivity Coaching
- Office Productivity Solutions

Others

- Emails and Collaboration
- Diagramming

Additional Services :

- Network & Server Management
- Project Management
- Coaching

About Micheal...

Graduated with a B. Sc. (Hons) Econs & Mgmt from University of London in 1999, Micheal decided to “break into” the IT industry. Since then, his continuous successes are an inspiration to both his colleagues and students.

Working Experiences

“Instructors train people..... not machines”

That is why Micheal stresses on people skills as well as technical expertise when conducting a class. Micheal’s classes are very popular because he is able to make learning a fun and lively experience.

Apart from training, Micheal also has project management experience, having managed projects ranging from software development, portal solutions, and infrastructure implementations.

Areas of Specialties

Areas of specialization include Internet Technologies, Portal and Collaboration, Web Designing, and Multimedia. Portal and Collaboration, as well as Office Productivity technologies are Micheal’s passion. In collaboration with the Microsoft Office 2007 product launch, Micheal worked closely with Microsoft Malaysia to conduct a series of seminars to promote awareness.

For 8 months, Micheal was contracted as a consultant for Philip Morris (M) Sdn. Bhd. He led a team of 14 publishers in designing and developing a web-based portal. Apart from content development he also administered the website, and its security. The client was highly impressed with Micheal’s performance, resulting in Philip Morris Regional Operations outsourcing their portal development to him.

Micheal has also been involved in SharePoint Portal implementations. Notably, Digi Telecommunications Sdn Bhd to migrate their existing SharePoint Portal 2001 to SharePoint Services 3.0.
